Reflectix® Installation Instructions for R-4.2, R-6.0, and R-8.0

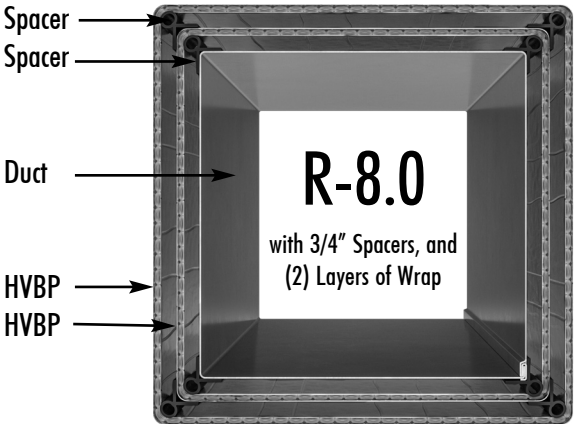

Installation Instructions with the hard plastic HVSPACER (for rectangular ducts)

1. Make sure the duct is free from dust and dirt by wiping it down with a shop rag.
2. Install the spacers to all four corners of the duct.
3. Place the spacers every 24" apart.
4. Wrap the Reflectix® over the spacers.
5. Fasten the Reflectix® by either tapping the seam or plier stapling the 2 edges together.
6. Saddle Hanger: Install the Reflectix® with a spacer on the two bottom edges of the duct directly between the clamp and the duct, to prevent the insulation from touching the duct.
   Strap Hanger: Wrap Reflectix® with the seam at the hanger.Tape the seam tightly around the hanger.

Shown to the left: Rectangular Duct with HV Spacer and Saddle Hanger

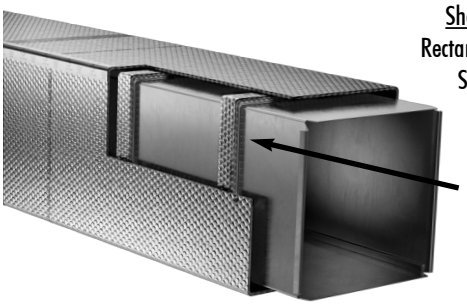

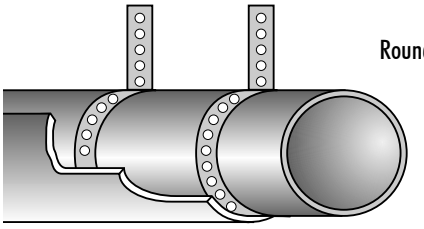

Installation Instructions with HVSP Bubble Wrap Spacer

1. Make sure all sheet metal joints, seams and penetrations are sealed.
2.. Double wrap spacer every 24" to 36" around ducting, fastening the spacers with UL181 Tape with Acrylic Adhesive. This will provide the necessary air space for the most effective use of Reflectix®. Reflectix® spacer (HVSP0202506) product is recommended.
3. Reflectix® Standard Edge material can then be cut to the proper size and wrapped around the duct.
4. Tape all seams with UL181 Tape with Acrylic Adhesive.
5. Saddle Hanger: Install the Reflectix® with a spacer located directly above the hanger, to prevent the insulation from touching the duct.
   Strap Hanger: Wrap Reflectix® with the seam at the hanger. Tape the seam tightly around the hanger.
   Factory Installed Insulation – Either Hanger: Ensure that the hanger contacts the insulation where a spacer is placed. The Reflectix® should not be in contact with the duct.

Note: Duct wrapped without any spacers direct to duct work is an R-4.2.
