Metal Building / Wall / New

Reflectix[®] Installation Instructions

- 1. Reflectix[®] Insulation
- 2. Exterior Wall Panel
- 3. 3/4" Thermal Break
- 4. Girt
- 5. Red Metal (Structural Frame)

Tools Required:

Safety Glasses Tape Measure Utility Knife Screw Gun Staple Gun

Recommended Products: Staple Tab, Reflective/Bubble/Bubble/Reflective - Roll: ST48100 (48"x 100')

Metal Interior with a 3/4" Thermal Break: R-8.2 Open Interior with a 3/4" Thermal Break: R-6.0* Metal Interior with a Nominal 3/4" Drape in Product (No Thermal Break): R-5.9 Open Interior with a Nominal 3/4" Drape in Product (No Thermal Break): R-4.7*

Installation Instructions: (There are 2 options)

1. Installed with 3/4" Thermal Breaks

- Install Reflectix[®] Reflective/Bubble/Bubble/Reflective, Staple Tab product vertically, using 1/2" self tapping screws. This will secure the insulation to the exterior of the C or Z girts.
- Tape the seams with a Reflectix[®] Foil Tape (goal is an air-tight, snug seam seal).
- Install a 3/4" thermal break and attach corrugated metal exterior finish.
- If an interior finish is applied, install the interior panels to the interior face of the girts.

This will create a 3/4'' air space between the exterior finish and the insulation and an 8'' air space between the insulation and the interior finish.

2. Installed with a 3/4" Drape in Product (No Thermal Break)

• When installing the product, insure there is a drape (towards the interior) of at least 3/4" at the center of the cavity.

* Includes thermal resistance of 1.70 interior air film.

Calculation Disclaimer: All values are calculated based on the "ASHRAE Handbook of Fundamentals".

Review These Important Safety Guidelines Prior to Installation:

- ALWAYS check local building codes before installing Reflectix®.
- ALWAYS check the area you are insulating and make any needed repairs. Any worn wiring should be replaced before you begin installing Reflectix*.
- <u>ALWAYS</u> make sure work areas are well ventilated and well lighted.
- <u>ALWAYS</u> use eye protection when operating a staple gun.
- <u>ALWAYS</u> use caution and common sense when using a staple gun. Be aware of where electrical wiring is located. Stapling into a wire can cause severe shock or death. <u>NEVER</u> staple into electrical wiring.
- ALWAYS be careful when working with large pieces of Reflectix® on windy days.
- When installing Reflectix® on bright sunny days, it is best to wear sun glasses.
- Do not work in areas such as attics when temperatures are too hot.
- Visit our website at www.reflectixinc.com for additional product and installation information.

Please Note:

The intention of these Installation Instructions and 3-D renderings are for the sole purpose of illustrating the correct location and relative position of the Reflectix[®] products in specific building assemblies. The correct construction methods and techniques are the responsibility of the installer or contractor. The methods outlined are recommendations on location of the Reflectix[®] products as a guideline. There are no claims on the part of Reflectix, Inc. that these building assemblies are finite standards or meet building code requirements (as they can vary by region).
