READ THIS BEFORE YOU BUY What You Should Know About R-values:

The chart shows the R-value of this insulation. R means resistance to heat flow. The higher the R-value, the greater the insulating power. Compare insulation R-values before you buy.

There are other factors to consider. The amount of insulation you need depends mainly on the climate you live in. Also, your fuel savings from insulation will depend upon the climate, the type and size of your house, the amount of insulation already in your house, and your fuel use patterns and family size. If you buy too much insulation, it will cost you more than what you'll save on fuel.

To get the marked R-value, it is essential that this insulation be installed properly.

<u>Note</u>: The stated R-value is only valid for the application specified when installed per the Installation Instructions on the label or on our website at www.reflectixinc.com. <u>Note</u>: All 0.75" dimensions are based on the thickness of a nominal 1"x2" furring strip.

Application: Nur Produ	nber of ct Layers:	Air Space Thickness and Location:	R-value and Direction (if required):
Attic	1	Exposed	Radiant Barrier
Basement Ceiling	1	One Air Space 9.5" between the product and the bottom of the floor decking	R-16
Cathedral Ceiling	1	One Air Space 0.75" between the product and the top of the fiberglass	R-6.0 Summer (down)
(Southern US)			R-2.0 Winter (up)
Cathedral Ceiling	1	One Air Space 0.75" between the product and the inside of the ceiling	R-7.0 Summer (down)
(Northern US)		sheathing (sheetrock)	R-1.0 Winter (up)
Crawl Space	1	One Air Space 9.5" between the product and the bottom of the floor decking	R-16
Crawl Space 2	2	Two air spaces a minimum of 4.75"- one between the product and the bottom	R-21
		of the floor decking and the second between the two layers of product	
Exterior Wall	1	Two 1.75" Air Spaces - one between the product and the exterior sheathing	R-6.1
(2″x 4″ Stud)		and the second between the product and the interior wall sheetrock	
Exterior Wall	1	One air space 0.75" between the product and the interior wall sheathing	R-3.9 (total assembly
(2″x 4″ Stud)			with R-13 batt = R-14
Exterior Wall	1	One air space 0.75" between the product and the interior wall sheathing	R-3.9 (total assembly
(2″x 6″ Stud)			with R-19 batt = R-21
Knee Wall 1	1	Exposed	R-3.0 (total assembly
			with R-13 batt = R-16)
Knee Wall 1	1	One 0.75" air space between the product and the fiberglass batt	R-6.0 (total assembly
			with R-13 batt = R-19)
Masonry Block Wall	1	One Air Space 0.75" between the product and the masonry block wall	R-3.7
Masonry Block Wall	1	One Air Space 1.5" between the product and the masonry block wall	R-4.2
Masonry Block Wall 1	1	Two 0.75" air spaces - one between the product and the block wall and the	R-6.1
		second between the product and the interior wall sheetrock	
Radiant Floor	1	One 0.75" air space between the product and the bottom of the upper floor	R-4.6
in a Sub-Floor		decking	
Radiant Floor	2	Two air spaces a minimum of 4.75"- one between the product and the bottom	R-21
on Wood Joists		of the floor decking and the second between the two layers of product	
Nork Shop/Storage	1	Two 1.75" air spaces - one between the product and the exterior wall	R-6.1
Rm 2″x 4″ Stud Wall		sheathing and the second between the product and the interior wall sheathing
